This document provides installation instructions for mounting the LS-BT1 location beacon in an indoor environment using the LS-BT1-MNT-50 accessory kit.

The LS-BT1 location beacon is referred to as *device* in rest of the document.

Package Contents

- 50 sets of mounting bracket and adhesive pad (one set per device)
- Installation guide (this document, printed)

Installing the Device using the Adhesive Pad

This mounting option allow mounting the device on a flat surface using an adhesive pad.

Required Tools and Equipment

The following tools and equipment are required for installing the device:

- An adhesive pad (included in the package)

Prerequisites

Before installing the device, ensure that the following surfaces are clean and dust-free.

- the mounting surface
- the grooves for adhesive pads on the bottom of the device

It is recommended to clean these surfaces using a solvent with 50/50 isopropyl alcohol/ water mixture.

### Installation Steps

To install the device using an adhesive pad:

1. Attach the adhesive pad on the grooved area on the back of the mounting bracket, as shown in Figure 1.

**Figure 1** *Attaching the Adhesive Pad to the Mounting Bracket*

2. Remove the protective film on the adhesive, attach the mounting bracket on the surface in the upright position, as shown in Figure 2.

Figure 2 *Removing the Protective Film*

3. Align the keyhole slots on the device with the projections on the mounting bracket, as shown in Figure 3.

Figure 3 *Aligning the Device with the Bracket*

4. Slide the device down until the clip of the mounting bracket snaps onto the top of the device, as shown in Figure 4.
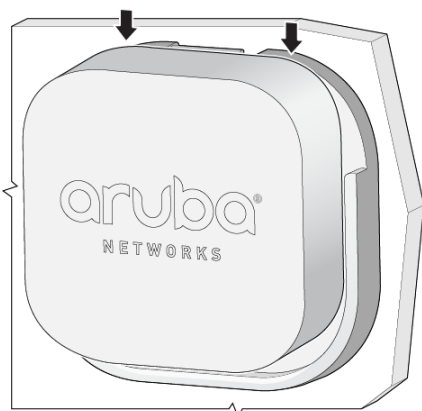

NOTE

Ensure that the device is activated before attaching it on the mounting bracket.

Installing the Device using Screws

This mounting option allows mounting the device on a flat surface using screws.

Required Tools and Equipment

The following tools and equipment are required for installing the device:

- One mounting bracket
- Two M3 flat head screws (not included in the package)
- Suitable screwdriver (not included in the package)

Installation Steps
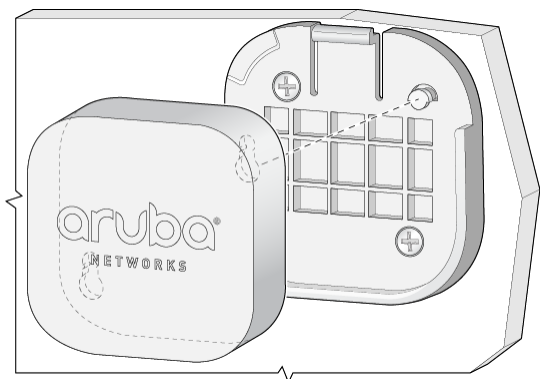

To install the device using screws:

1. Choose a flat surface for the mounting bracket.
2. Secure the mounting bracket in the upright position on the surface using two M3 flat head screws, as shown in Figure 5.

Figure 5 *Securing the Mounting Bracket on a Flat Surface*

3. Align the keyhole slots on the device with the projections on the mounting bracket, as shown in Figure 6.

Figure 6 *Aligning the Device with the Mounting Bracket*

4. Slide the device down until the clip of the mounting bracket snaps onto the top of the device, as shown in Figure 4.

NOTE

Ensure that the device is activated before attaching it on the mounting bracket.
